PROFESSIONAL SUMMARY

Aspiring Python Backend Developer currently pursuing a Python Backend Web Development course at TOPS Technologies alongside a BCA degree from Atmiya University, Rajkot. The course is currently completed up to Django CRUD development. Skilled in Python, SQL, MySQL, HTML, CSS, JavaScript, Bootstrap, and Django (CRUD), with hands-on experience using AI tools such as ChatGPT, GitHub Copilot, and Claude to support development, debugging, and learning.

Built projects including TransitOps (Smart Transport Operations Platform), a Recipe Management Website, and a Tours & Travel Booking System, and I'm focused on building practical backend applications as a Python/Django Developer.

CORE SKILLS & TOOLS

Python	HTML(Basic)	SQLite	MySQL	Django	OOPS
Backend	API Integration	GitHub	ChatGPT	AI Tools	File Handling

★ **AI Tools:** ChatGPT, Google Gemini, Claude AI — used for code generation, debugging, and development acceleration.

WORK EXPERIENCE

Programming Task Contributor | Freelancing

- Worked on structured programming tasks involving multiple files such as prompt, problem, interface, requirements, and rubric
- Analyzed and resolved errors in problem statements, interface definitions, and requirement files
- Created and improved rubric files for evaluating task quality and correctness
- Applied logical thinking and debugging skills to ensure accuracy and consistency across tasks
- Gained hands-on experience in problem analysis, code understanding, and structured documentation Worked with Python and managed data using MySQL and databases. Collaborated with frontend developers to integrate backend APIs and deliver complete web features.

Graphic Design Intern | Ocean Infotech

- Designed social media posts, banners, and marketing creatives using Canva
- Assisted in developing visual content based on client requirements

- Assisted in developing visual content based on client requirements
- Gained practical experience with input validation, session handling, and clean code practices.

Python Backend Developer (Trainee) | TOPS Technologies

2026-present

- Working on backend development using Python as part of structured professional training.
- Building and maintaining web applications, managing databases, and connecting backend logic to frontend interfaces.
- Applying best practices in backend architecture and strengthening skills across the full backend development lifecycle.

EDUCATION

Bachelor of Computer Applications Atmiya University,Rajkot	CGPA:9.42	2023 – 2026
Higher secondary Shri Raj School , Rajkot	PR:99.06	2022 – 2023
Backend Developer Training TOPS Technologies, Rajkot		2025 – 2026

LANGUAGES

English (Proficient) | **Gujarati** (Native) | **Hindi** (Conversational)

ACHIEVEMENTS & EXTRA CURRICULARS

- Achieved 7th Rank in BCA at Atmiya University with a CGPA of 9.42/10.00.
- Secured 6th Rank in Higher Secondary (Commerce) School Academic Performance
- Continuously self-learning new AI tools and backend technologies to stay current with industry trends.

CERTIFICATES :

- Python Fundamentals for Beginners - Great Learning
- Great Learning Graphic Designing Internship Certificate – Ocen Infotech (Completed Internship)

KEY PROJECTS

TransitOps – Smart Transport Operations Platform (Team Project)

Technologies: Python, Django, SQLite, HTML5, Tailwind CSS, JavaScript

- Developed a Smart Transport Operations Platform as part of the Odoo Hackathon in a collaborative team environment.
- Built modules for vehicle, driver, trip, maintenance, fuel, and expense management with secure Role-Based Access Control (RBAC).
- Implemented business rule validations, including vehicle availability, driver license verification, cargo capacity checks, and automated status transitions.
- Designed responsive dashboards using Tailwind CSS to display fleet KPIs, operational insights, fuel efficiency, and expense analytics.
- Collaborated with team members on backend development, database design using SQLite, testing, debugging, and feature integration with Django.

HireHub – AI-Powered Online Job Portal

Technologies: Python, Django, SQLite, HTML5, Tailwind CSS, JavaScript

- Developed a full-stack Job Portal with separate dashboards for Job Seekers, Employers, and Admin.
- Implemented role-based authentication, profile management, and secure login system.
- Built features for job posting, job search, resume upload, and application tracking.
- Developed employer modules for candidate management, interview scheduling, and offer letter generation.
- Integrated AI features such as Resume Analyzer, ATS Score, Job Recommendations, and Smart Candidate Matching.
- Created responsive dashboards with analytics, reports, and modern UI using Tailwind CSS.

Travel Booking System

Technologies: PHP, MySQL, HTML5, CSS3, JavaScript

- Developed a dynamic travel booking website with multiple pages including Home, Packages, About Us, and Contact Us.
- Implemented secure user registration and travel package booking functionality.
- Generated downloadable booking tickets after successful reservations.
- Integrated a MySQL database to manage users, bookings, and travel package information.
- Designed a responsive and user-friendly interface with seamless navigation and efficient backend integration.

Recipe Website

Technologies: PHP, MySQL, HTML5, CSS3, JavaScript

- Developed a responsive recipe management website featuring Home, Categories, Recipes, About Us, and Contact pages.
- Organized recipes category-wise for quick and easy navigation.
- Implemented a user review and feedback system for recipes.
- Used PHP and MySQL to manage dynamic recipe content and user interactions.
- Designed a clean, responsive interface with optimized navigation across multiple devices.
